

TOPICS

- Lagrangian and Hamiltonian mechanics
- Symplectic and Poisson geometry and their applications to mechanics
- Geometric and optimal control theory
- Geometric and variational integration
- Geometry of stochastic systems
- Geometric methods in dynamical systems
- Continuum mechanics
- Classical field theory
- Fluid mechanics
- Infinite-dimensional dynamical systems
- Quantum mechanics and quantum information theory; applications in physics, technology, engineering, and the biological sciences

EDITORIAL BOARD

Editor-in-Chief: Manuel de León

(Instituto de Ciencias Matemáticas, Spain)

Managing Editors:

Andrew Lewis (Queen's University, Canada)

Juan-Pablo Ortega (CNRS, Besançon, France)

Anthony Bloch (Univ. of Michigan, USA)

Hernán Cendra (Univ. Nacional del Sur, Argentina)

Adrian Constantin (School of Math., Trinity College, Ireland)

Gianne Derks (Univ. of Surrey, United Kingdom)

Marcelo Epstein (Univ. of Calgary, Canada)

Rui Loja-Fernandes (IST, Lisboa, Portugal)

Janusz Grabowski (Institute of Mathematics, Poland)

Darryl Holm (Imperial College London, United Kingdom)

Arieh Iserles (University of Cambridge, UK)

Jair Koiller (Fundação Getúlio Vargas, Rio de Janeiro, Brasil)

Yvette Kosmann-Schwarzbach

(Centre de Math. Laurent Schwartz, Ecole Polytechnique, France)

Melvin Leok (University of Purdue, USA)

Naomi Leonard (Princeton University, USA)

Kirill C.H. Mackenzie (Sheffield University, UK)

Juan C. Marrero (Universidad de La Laguna, Spain)

Jerrold E. Marsden (CalTech, USA)

David Martín de Diego (Instituto de Ciencias Mat. Spain)

Sonia Martínez (Univ. of California at San Diego, USA)

Peter Michor (Universität Wien, Austria)

Tudor S. Ratiu (Ecole Polyt. Fédérale de Lausanne, Switzerland)

Witold Respondek (INSA, Rouen, Francia)

Mark Roberts (University of Surrey, UK)

Willy Sarlet (University of Gent, Belgium)

Juergen Scheurle (Technische Universität München, Germany)

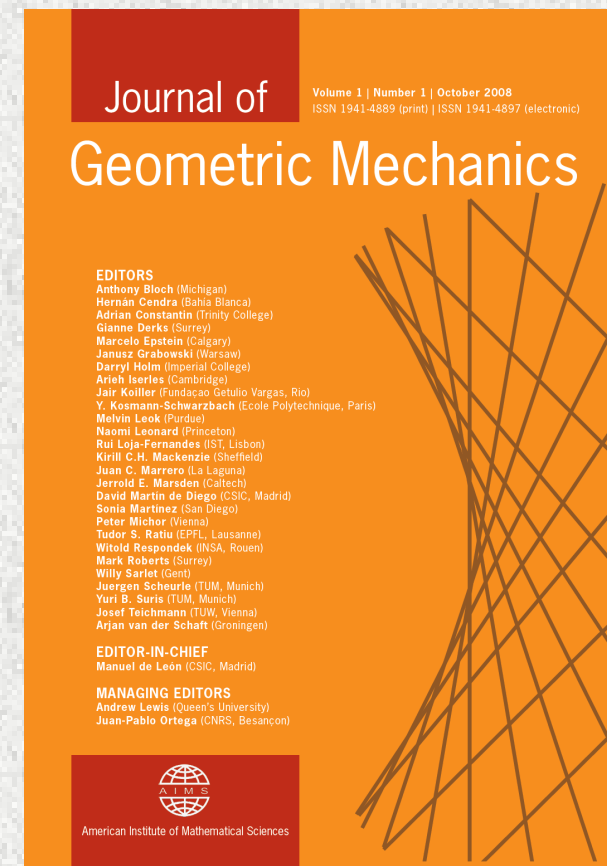

Yuri B. Suris (Technische Universität München, Germany)

Josef Teichmann (Vienna University of Technology, Austria)

Arjan van der Schaft (Univ. of Groningen, The Netherlands)

NEW JOURNAL

JOURNAL OF GEOMETRIC MECHANICS

ISSN 1941-4889 (print)

ISSN 1941-4897 (online)

<http://aims sciences.org/journals/jgm/>

ABOUT THE JOURNAL

The *Journal of Geometric Mechanics* (JGM) aims at publishing research articles devoted to geometric methods in mechanics and control theory, and intends to facilitate interaction between theory and applications.

The journal is published by the American Institute of Mathematical Sciences (AIMS) with the support of the Consejo Superior de Investigaciones Científicas (CSIC, Spain).

As a quarterly publication, JGM is scheduled to inaugurate in March 2009.

The original format will be four quarterly issues per year with a total of about 800 pages. Depending on the availability of high quality papers both the frequency and the size of the issues may increase in the future.

During the initial period of its existence, electronic files of the papers accepted and published in the journal will be available at no charge from the journal's public website.

Afterwards, the papers will be available from acceptance until some time after publication. Paid subscription will automatically include both a paper copy and electronic access.

MANUSCRIPT PREPARATION

Template Tex files are at

http://aimsciences.org/journals/Tex_prep.htm.

Authors of accepted manuscript should prepare their final Tex file using AIMS template, which can be downloaded from the above web page.

Each paper requires an abstract not exceeding 200 words summarizing the techniques, methods and main conclusions. To facilitate key words searching and indexing, all manuscripts shall contain AMS subject classification information and key words. In order to read the changes suggested by our copy editors, you may need to use the latest Adobe Reader.

Contributions to this journal are published free of charge.

SUBMISSIONS

All submissions to Journal of Geometric Mechanics should be sent electronically either to JGM@aimSciences.org or submitted directly to any editor with a copy to JGM@aimSciences.org.

All papers should contain complete proofs of the principal results.

There are no restrictions on the size of an individual paper.

Papers with a comprehensive treatment of an important area including a detailed and illuminating treatment of necessary background will be given favourable consideration.

Expository papers are welcome.

All papers will be reviewed, and positive recommendations by the editor are put before the editorial board for final approval. Usually a decision will be communicated to the author within 2 months of submission, and the editorial board is committed to rendering a decision within 6 months in all cases.
